

Use of Private Technology Devices by Students

Students may possess privately-owned technological devices on school property and/or during school sponsored-activities, in accordance with the mandates of this policy and any applicable administrative regulations as may be developed by the Superintendent of Schools.

Definitions

Board Technology Resources

For the purposes of this policy, “Board technology resources” refers to the Board of Education’s (the “Board’s”) computers and instructional technologies; communications and data management systems; informational technologies and the Internet; and any other technology resources owned and/or used by the school district and accessible by students.

Privately Owned Technological Devices

For the purposes of this policy, “privately owned technological devices” refers to privately owned desktop computers, wireless and/or portable electronic hand-held equipment that can be used for word processing, wireless Internet access, image capture and recording, sound recording, information transmitting and/or receiving, storing, etc. These devices may include, but are not limited to, desktops, personal laptops, Smartphones, network access devices, Kindles, Nooks, cellular telephones, radios, personal audio players, iPads or other tablet computers, walkie-talkies, Blackberries, personal data assistants, iPhones, Androids, and other electronic signaling devices.

Use of Privately Owned Technological Devices

The Clinton Board of Education provides appropriate devices for the learning environment, therefore, privately owned technological devices may not be used during instructional time, except as specifically permitted by instructional staff or unless necessary for a student to access the district’s digital learning platform or otherwise engage in remote learning.

On school property, at a school-sponsored activity, while in use for a remote learning activity, or while being used to access or utilize Board technology resources, the use of any such device for an improper purpose is prohibited. Improper purposes include, but are not limited to:

- Sending any form of a harassing, threatening, or intimidating message, at any time, to any person (such communications may also be a crime);
- Gaining or seeking to gain unauthorized access to Board technology resources;
- Damaging Board technology resources;
- Accessing or attempting to access any material that is obscene, obscene as to minors, or contains pornography;
- Cyberbullying;
- Using such device to violate any school rule, including the unauthorized recording (photographic, video, or audio) of another individual without the permission of the individual or a school staff member;

Use of Private Technology Devices by Students

- Taking any action prohibited by any Federal or State law; or
- Using such device in a manner that allows established Board filters and safety protocols to be bypassed.

Search of Privately Owned Technological Devices

A student's privately owned technological device may be searched if the device is on Board property or in a student's possession at a school-sponsored activity and if there are reasonable grounds for suspecting that the search will turn up evidence that the student has violated or is violating either the law or the rules of the school. Any such search shall be reasonably related to the objectives of the search and not excessively intrusive in light of the age and sex of the student and the nature of the infraction.

Responsibility for Privately Owned Technological Devices

Students are responsible for the safety and use of their privately owned technological devices. If a privately owned technological device is stolen, lost, or damaged while the device is on school property or during a school-sponsored activity, a report should be made to the building principal, who will investigate the loss in a manner consistent with procedures for stolen or damaged personal property. Students and parents should be aware that the Board is not liable for any privately-owned technological device that is stolen, lost, or damaged while at school or during a school-sponsored activity. For that reason, students are advised not to bring their privately-owned technological devices to school.

Disciplinary Action

Misuse of the Board's technology resources and/or the use of privately-owned technological devices to access or utilize the Board's technology resources in an inappropriate manner or the use of such devices in any manner inconsistent with this policy will not be tolerated and will result in disciplinary action. For students, a violation of this policy may result in loss of access privileges, a prohibition on the use and/or possession of privately-owned technological devices on school property or at school-sponsored activities, and/or suspension or expulsion in accordance with Board Policy #5114 related to student discipline.

Harm to Technology Resources

Any act by a student using a privately owned technological device that harms the Board's technology resources or otherwise interferes with or compromises the integrity of the Board's technology resources will be considered vandalism and will be subject to the discipline in accordance with Board Policy #5114 and/or appropriate criminal or civil action.
