Technology Education 7
(TE 8482)
Grade 7
One-quarter Credit, One Nine Weeks

Counselors are available to assist parents and students with course selections and career planning. Parents may arrange to meet with the counselor by calling the school's guidance department.

COURSE DESCRIPTION

The courses in engineering and technology provide opportunities for students to acquire skills and knowledge necessary for technological literacy, entry-level careers and lifelong learning. Students learn Virginia's 21 Workplace Readiness Skills within the content area. Those who are completing a two-year sequence have the opportunity to verify their knowledge of the workplace readiness skills through an industry assessment. In this nine-week course, students make projects or models of significant inventions that have advanced society and human potential. Students follow formal procedures to create new solutions or inventions to solve problems. They explore STEM fields by following a modular program to facilitate the study of technology.
